A New Service for Parents

It can be troublesome for parents with young children to go shopping in crowded places. For this reason, more shopping centers have started offering their customers childcare services. Some customers with children choose shopping centers that provide these services. In this way, they do their shopping more easily. Such services are becoming available even in places such as theaters and hospitals.

Your story should begin with this sentence: One day, the Sasaki family went to an art museum that offered childcare services.

I think shopping online is very convenient.

First, it saves time. People can look at and buy things from their homes without going to stores. This is very good for busy people because they can shop anytime, day or night. It is also good for an environment because we can reduce fuels by not using transportation such as cars and buses.

Second, online shopping usually has better prices and more choices. Many websites have discounts that stores do not have, and people can easily compare prices from different sellers. Also, online stores often have more items than local shops, so it is easier to find what you need.

In conclusion, saving time and getting good deals make online shopping a great choice for many people. < 125 words >

I believe that shopping online is very convenient.

First, it saves time. People can browse and purchase items from the comfort of their own homes, without needing to travel to physical stores. For example, I recently bought a book online while sitting in my living room, which saved me a trip to a bookstore. I was able to spend more time for reading that day.

Second, online shopping often provides better prices and more variety. For instance, I found a pair of shoes online for half the price compared to a local store. So I decided to buy two brand new pairs of shoes which saved a lot of money!

As a conclusion, the convenience of time-saving and better deals make online shopping a great choice for many people. < 129 words >
